

# DermaUH

Multiplatform web application to assist dermatologists in the digitalization, diagnosis and monitoring of skin lesions

## MOTIVATION

Our dermoscopy healthcare system lacks a unified platform for patient care. Images and patient's data is scattered, and collaboration among doctors is limited. Dermoscopic personnel need diagnostic support to give a more faster diagnosis improving the patient's outcome.

## SERVICES

### Automated Diagnosis

Instantaneous, **AI**-powered diagnosis just one click away

### Seamless Patient Management:

Register, diagnose, and track patient **progress** with ease

### Advanced Image Processing

State-of-the-art techniques to **improve** medical image quality.

### Effective Collaboration

**Connect** with fellow physicians for better patient outcomes.

### Universal Web Access

Convenience of **multi-platform** compatibility.

## OUR GOAL

**DERMAUH** is an *integrated platform* that consolidates patient data, *encourages collaboration* among medical professionals, and provides essential *diagnostic support* to ensure timely and effective treatment for all. This unified approach promises to enhance the quality of dermatological care and foster innovation in the field.

## WHO IS DERMAUH FOR?

- Dermatology specialists
- Residents in training
- Researchers

This versatile platform can aid dermatologists in their daily responsibilities at any healthcare facility.

## THE TEAM

The collaboration of medical imaging researchers, software developers, and dermatology specialists within our team is what drives the creation of this groundbreaking software in our country.

Embrace the future of cuban dermoscopy healthcare: accessible, efficient, and intelligent.
